

MOEN®
KEEPING THE BATH
CLEANER – WITH
TOUCHLESS TECHNOLOGY

MotionSense Wave™ Technology

In today's world, touchless technology in the residential bath is not just a convenience but a safety measure. Moen's MotionSense Wave™ technology allows users to easily turn water on and off with the wave of a hand, perfect for when hands are too messy or full to turn on the faucet. This helps minimize the spread of dirt and germs, since there's no need to touch the faucet to start the flow of water. Touchless technology delivers water only when users need it, helping homeowners conserve water and minimize waste.

MotionSense Wave is now available in stylish, one-handle lavatory faucets in three popular bath suites: Flara™, Doux™ and Cia™. These suites represent a range of styles from transitional to modern, each one seamlessly integrating the new technology. With a wave of your hand, you can start or stop the flow of water. In addition, a single handle allows for manual controls.

AVAILABLE FINISHES*

-  Chrome
-  Brushed Nickel
-  Brushed Gold
-  Polished Nickel
-  Matte Black

* Finishes vary by suite.

WHY? *Because Moen exists to help people discover, improve and customize their relationship with water.*
